PATENT Customer No. 22,852 Attorney Docket No. 4853.0023-02

## **Amendments to the Claims:**

This listing of claims will replace all prior version, and listings, of claims in the application:

## **Listing of Claims:**

- 1-17. (Canceled)
- 18. (Previously Presented) A plant growth factor peptide obtained by collecting cells from liliaceous plants, incubating the collected cells in a plant cell cultivation medium, and separating said plant growth factor peptide from the cells through centrifugation.
- 19. (Currently Amended) A plant growth factor peptide, wherein the plant growth factor peptide has the following physico-chemical properties:
  - a) it is soluble in water, but is hardly soluble in ethanol and acetone;
  - b) it is acidic;
- c) it keeps 70% of its activity, after being heated at 100°C for 10 minutes and it is inactivated, after being autoclaved at 121°C for 20 minutes;
- d) it is a polar substance, and is not retained in reversed-phase columns with Cosmosil 75C<sub>18</sub>-OPN porous spherical silica particles with an average size of 75 μm and an average pore size of 120 Å and Diaion HP-20 a synthetic adsorbent ion exchange resin with the following chemical structure

PATENT Customer No. 22,852 Attorney Docket No. 4853.0023-02

- e) it is stable at pH of 3 to 9, but at pH 11, its activity is reduced to 60%;
- f) it is inactivated by Pronase E a proteolytic enzyme obtained from Streptomyces griseus, but it is not inactivated by Glycosidases "Mixed"; and
- g) it is adsorbed to DEAE Sephadex A-25 2-(diethylamino)ethyl-moiety containing ion-exchange resin (and eluted with 1000 mM KCl), but it is not adsorbed to CM Sephadex C-25 a carboxymethyl-moiety containing ion-exchange resin.
